Attention: Mr. Rob Harmon - Engineer

Re: Letter of June 15, 1993
Re: Hydrite Chemical

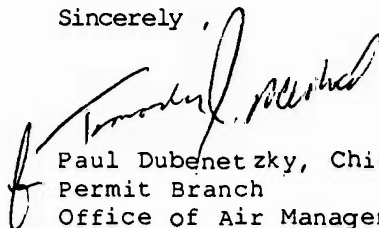

Dear Mr. Harmon:

After further review, we concur that recovery of SO₂ reagent is indeed part of the process of making ammonium bisulfate, magnesium bisulfate, and sodium bisulfate.

The reasoning for this opinion is that the SO₂ is absolutely necessary for the process, and would not be generated by any other process at that source. The fact that the SO₂ is purchased rather than generated indicates the necessity of the material.

If you have further questions, please do not hesitate to contact us.

Sincerely,

Paul Dubenetzky, Chief
Permit Branch
Office of Air Management
